

### 1.1.11: Live Lab: Explore the SecAI Lab Environment

SecAI+ (Exam CY0-001) - PROD

Duration: 38 minutes, 43 seconds

Congratulations, you passed!

✓ What is the primary purpose of the AI-Assisted Security Analysis Framework used in this lab series? Score: 2

- ☐ To automatically complete all lab tasks without user input.
- ☒ To provide a structured environment for working with OpenWebUI, models, prompts, and tools to build security skills.
- ☐ To grade only the multiple-choice questions at the end of each lab.
- ☐ To replace the need for any virtual machines in the lab environment.

Correct!

✓ Which statement best describes the difference between Assisted, Applied, and Challenge labs in this series? Score: 2

- ☐ Assisted labs have strict time limits; Applied and Challenge labs have no time limits.
- ☐ Assisted labs are unscored; Applied labs are partially scored; Challenge labs are never scored.
- ☒ Assisted labs guide you through steps; Applied labs require you to configure settings with less step-by-step guidance; Challenge labs expect you to recall and apply knowledge with no detailed guidance.
- ☐ Assisted and Applied labs are identical, but Challenge labs cannot be extended.

Correct!

✓ Which of the following actions correctly uses the lab interface as described in the instructions? Score: 2

- ☒ Selecting the Resources tab in the Instruction panel to view available VMs such as Ubuntu SecAI.
- ☐ Custom models enforce workflow consistency regardless of user experience level
- ☐ Using the Windows logo key to open the Start menu inside the virtual desktop environment (VDE).
- ☐ Ending the lab by closing the browser tab without using any buttons in the interface.

Correct!

✓ According to the lab duration guidelines, which statement is correct?

Score: 2

- ☐ All labs must be completed within 60 minutes and cannot be extended.
- ☐ Assisted labs are allowed 60–90 minutes, and applied/challenge labs are limited to 10–20 minutes.
- ☐ Only challenge labs can be extended to 150% of the original duration.
- ☒ Assisted labs should generally be completed in 15–30 minutes, while applied and challenge labs should generally be completed in 20–40 minutes.

Correct!

☒ Which practice is required to ensure your work is correctly scored by the lab scripts? Score: 2

- ☐ Using any name you prefer for users and folders, as long as the configuration is functionally correct.
- ☐ Only using lowercase letters for all names so the scripts can normalize them automatically.
- ☐ Completing all tasks within 20 minutes, even if you ignore naming conventions.
- ☒ Matching the exact case-sensitive names, labels, or output locations specified in the instructions.

Correct!
