

5.3.3: Live Lab: Transform Documentation into Insights with AI

SecAI+ (Exam CY0-001) - PROD

Duration: 1 hour

Congratulations, you passed!

Group 1

Score: 4/4, 100%

☒ What is the primary weakness of using a simple prompt like "summarize this file" when working with security documentation? Score: 1

- ☐ It takes too long to process
- ☒ It produces summaries that are often brief, shallow, and miss important details
- ☐ It requires special permissions to execute
- ☐ It only works with PDF files

Correct!

☒ In the Diagram Orchestrator pipeline, what tool is used to parse CSV files instead of relying on the LLM alone? Score: 1

- ☐ Excel
- ☐ Mermaid
- ☒ Pandas
- ☐ PowerShell

Correct!

☒ What is the primary advantage of using a custom model over ad-hoc prompting for security document analysis? Score: 1

- ☐ Custom models process faster
- ☒ Custom models enforce workflow consistency regardless of user experience level
- ☐ Custom models can handle larger files
- ☐ Custom models don't require knowledge bases

Correct!

☒ In the summary chain workflow, what is the primary purpose of starting by identifying major security categories? *Score: 1*

- ☐ To reduce file size
- ☒ To give structure to the entire chain and avoid scattered or uneven summaries
- ☐ To encrypt sensitive information
- ☐ To validate the document format

Correct!

☒ **Check Security Summarizer Model**
Correct!

Score: 3

☒ **Check Prompts 2**
Correct!

Score: 3
