

2.1.4: Live Lab: Analyze Threats using Public Resources

SecAI+ (Exam CY0-001) - PROD

Duration: 1 hour, 30 minutes

Congratulations, you passed!

Group 1

Score: 4/4, 100%

☒ Which MITRE ATT&CK tactic does the Anthropic AI extortion campaign best demonstrate?

Score: 1

- ☒ Data Exfiltration
- ☐ Privilege Escalation
- ☐ Defense Evasion
- ☐ Command and Control

Correct! The attack focused on stealing and ransomware data, which aligns with Data Exfiltration.

☒ How did using the Claude code AI tool enable the attackers?

Score: 1

- ☒ It allowed the attackers to automate the operation
- ☐ It gave the attackers malware used by other groups
- ☐ It taught the attackers how to write malware
- ☐ It did not help them due to AI safety protocols

Correct! The AI tool allowed for a great deal of automation.

☒ Which mitigation would most reduce the effectiveness of AI-driven extortion campaigns like the one described?

Score: 1

- ☒ Implementing strong data-loss prevention (DLP) and encryption controls
- ☐ Requiring longer employee passwords every 30 days
- ☐ Disabling all AI tools across the organization
- ☐ Blocking access to social media sites on corporate networks

Correct! DLP and encryption directly limit data theft and exposure, disrupting the extortion process.

☒ Which sector was most heavily targeted in the Anthropic August 2025 AI extortion campaign? *Score: 1*

- ☐ Financial services
- ☒ Healthcare organizations
- ☐ Retail and e-commerce
- ☐ Manufacturing and logistics

Correct! This sector held large volumes of sensitive personal data, making it a prime target for extortion.
