

2.2.10: Live Lab: Apply Structured Prompt Templates

SecAI+ (Exam CY0-001) - PROD

Duration: 49 minutes, 23 seconds

Congratulations, you passed!

Group 1

Score: 4/4, 100%

☒ What is the primary benefit of using structured prompt templates in security operations? Score: 1

- ☐ They make AI responses longer and more detailed
- ☒ They standardize outputs, reduce ambiguity, and enforce professional formats
- ☐ They eliminate the need for human analysts
- ☐ They automatically detect all security threats

Correct!

☒ How should the Executive Summary template be written for leadership? Score: 1

- ☐ Using as many technical acronyms as possible
- ☒ In plain language without acronyms, focusing on business impact
- ☐ As a detailed technical analysis with code samples
- ☐ As a brief bullet-point list only

Correct!

☒ What is the main disadvantage of uploading large files directly to the AI model, as mentioned in the lab? Score: 1

- ☐ The files get corrupted during upload
- ☒ Responses are slow, details may be skipped, and outputs are often inconsistent
- ☐ The model cannot read JSON files
- ☐ It requires administrator permissions

Correct!

☒ What is the key difference between using a Python helper script versus uploading files directly to the AI model? *Score: 1*

- ☐ Helper scripts can only work with text files
- ☒ Helper scripts preprocess data, build structured prompts, and can enforce formats automatically
- ☐ Direct uploads are always faster and more efficient
- ☐ Helper scripts require manual data entry for each analysis

Correct!

☒ **Check Prompts 2**
Prompts Validated!

Score: 3

☒ **Check Prompts 1**
Prompts Validated!

Score: 3
