

3.2.5: Live Lab: Sanitize Data for AI Analysis

SecAI+ (Exam CY0-001) - PROD

Duration: 1 hour, 3 minutes

Congratulations, you passed!

Group 1

Score: 4/4, 100%

☒ What is the primary purpose of sanitizing data before using it with AI models? Score: 1

- ☐ To reduce the file size of datasets
- ☒ To ensure AI outputs are reliable, accurate, and safe
- ☐ To make data processing faster
- ☐ To comply with software licensing requirements

Correct!

☒ What was the key lesson demonstrated when comparing AI responses to dirty vs. clean data? Score: 1

- ☐ AI models cannot process CSV files effectively
- ☒ The quality of an AI response is only as good as the data it's given
- ☐ Manual cleaning is always superior to automated cleaning
- ☐ Clean data eliminates the need for prompt engineering

Correct!

☒ What is the Open-WebUI Knowledge Store used for? Score: 1

- ☐ To store AI model training algorithms
- ☒ To upload documents or datasets for the model to reference in chats
- ☐ To backup cleaned data to the cloud
- ☐ To create visualizations of data quality metrics

Correct!

☒ Why is consistent formatting (grammar, capitalization, punctuation) essential for AI datasets? Score: 1

- ☐ It makes the dataset look more professional
- ☐ It reduces file size
- ☒ It increases accuracy and reduces confusion, preventing duplicate or incomplete results
- ☐ It is required by law for data compliance

Correct!

☒ **Check Prompts 1** Score: 3
Prompts Validated!

☒ **Check Prompts 2** Score: 3
Prompts Validated!
